Kraftform Stainless - stainless steel to prevent rust

High quality Kraftform Plus VDE screwdriver out of stainless steel by Wera. The stainless tools from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. They can be used for industrial application without hesitation.

The individual testing of the Kraftform Stainless VDE screwdrivers at 10,000 volts as per DIN EN 60900 (IEC 60900) ensures safe working with voltages of up to 1,000 volts. Secure working is also ensured under extreme conditions and verified with the proven cold impact resistance at -40° C. Kraftform handle for fast and low-fatigue working.

Take it easy Tool Finder: colour coding according to profile and size. The hexagonal anti-roll feature prevents any bothersome rolling away at the workplace.

Kraftform Kompakt VDE 24 Allrounder Set 1

The all-rounder set for VDE applications. Two bladeholding screwdrivers 837 i RA and 817 VDE for Kraftform Kompakt VDE blades (837 i RA with ratchet functionality for accelerated screwdriving).

11 Kraftform Kompakt blades for slotted screws, Phillips-head screws (Phillips and Pozidriv) and TORX® screws. Even low-lying screw and spring elements can be reached thanks to the reduced blade diameter. The Take it easy Tool Finder (colour coding by profile as well as laser-engraved size indication) makes it easy to reach for the required blade.

One T-handle with ratchet functionality for 1/4" sockets. The recesses in the fast-rotating sleeve on the blade allow resistance to be generated by finger force which allows the ratchet mechanism to be used even at low resistance of the screw.

9 sockets offer increased safety thanks to the 2-component insulation with a yellow insulation core under an outer red insulation layer. The inner yellow insulation layer becomes visible if the outer red VDE insulation layer is damaged.

All tools are individually tested at 10,000 Volt as per IEC 60900. Space-saving and safe storage in a textile box. The textile box can be docked directly onto the Wera 2go transport system or attached to the workshop trolley, tool wall, etc with the included hook and loop fastener strip.

Kraftform Kompakt Turbo i 1 Tool finder

Many users wish to carry out screwdriving operations faster without compromises. With a screwdriver which is precise, allows powerful end screwdriving and is also much faster than a conventional screwdriver. The solution: A planetary drive that can be switched on and off: Integrated in the handle it quadruples the working speed in smooth couplings all mechanically. One hand holds the front part of the handle, the second hand turns the back part of the handle.

The turbo function can be switched on and off at the push of a button. Turning it off is recommended for tightening and loosening with high torque as well as for fine adjustments. Robust, maintenance-free steel drive with maximum torque of 14 Nm when the turbo function is deactivated.

In the VDE version, the 827 T i Kraftform Turbo bitholding screwdriver with the Wera VDE blades individually tested as per IEC 60900 ensures fast and safe working even under tension (up to 1,000 volt). VDE blades with Take it easy Tool finder: Colour coding by profile and laser-engraved size indication - for quick and easy identification of the required tool. In a robust belt pouch. The textile box features a fleece zone at the back. Using the provided self-adhesive hook and loop fastener strips, the textile box can be attached to the Wera 2go components. Or to the wall, shelf or workshop trolley.

- 4 times the screwdriving speed thanks to the turbo function (purely mechanical - without battery)
- Activate and deactivate the turbo function by a simple push of a button
- Turbo function especially for smooth couplings
- Can be used without the turbo function like a normal screwdriver for couplings with steadily increasing torque
- Robust, maintenance-free gear made of steel

6004 Joker VDE 4 Set 1 VDE-insulated self-setting spanner set

Individually tested tools as per IEC 60900 at 10,000 V for safe working at the approved voltage of 1.000 V. The adjustable VDE spanner continuously and automatically grips all hexagonal sizes in the indicated range of dimensions - metric and imperial.

The integrated lever mechanism securely clamps the hexagon screw or bolt between the jaws, which significantly reduces the risk of slippage or damage. The ratchet feature ensures fast and consistent screwdriving without removing the tool.

By using the corner-width rectangular prisms, a back-pivoting angle of only 30° can be achieved. The single-arm design, in conjunction with the ratchet feature and the corner-width prism, makes it possible to work even in confined spaces.

The adjustable Joker 6004 VDE has a naturally comfortable handle thanks to the 2-component plastic insulation.

Safety is increased by the anti-slip protection at the front end of the handle. The sliding function offers contactless and safe opening of the non-insulated jaws, thereby providing extra protection.

- The compact textile box with four adjustable Joker 6004 VDE covers all metric and imperial dimensions in the field of application from 7 to 19 mm or ¼" to ¾"

400 i VDE Hex Insulated torque-indicator

Wera VDE torque indicator with fixed torque for hexagon socket screws. Tamper proof. The robust slip clutch generates a clearly audible and tactile trigger that signals when the set torque is reached, making it impossible to apply any further torque. The loosening torque is significantly higher than the set tightening torque, therefore no additional tools are needed for loosening screw connections. The shape of the handle perfectly fills the whole hand and fingers comfortably lie in the softly rounded recessed grips. This ensures optimal, ergonomic power transfer. Individually tested tool as per IEC 60900 at 10,000 V for safe working at the approved voltage of 1,000 V.

- Insulated, individually tested VDE T-handle torque indicator for safe working up to 1,000V
- T-handle is ideal for transferring controlled tightening torque and high loosening torque
- Error-free screwdriving due to non-slip friction clutch and exact torque transmission
- Distinctly audible and noticeable excess-load signal when the pre-set torque is reached
- Tamper-proof against accidental changing of set torque value
