

867/4 IMP DC TORX® DIY Impaktor bits, TX 15 x 50 mm, 5 pieces

Bits for TORX® Screws

EAN:	4013288169259	Size:	85x50x17 MM
Part Number:	05057663001	Weight:	47.5 G
Article Number:	867/4 IMP DC TX 15 x 50 mm DIY-Box	Country of origin:	CZ
		Customs Tariff	8207906000
		Number:	

- For recessed and TORX® screws
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, biting into the screwhead to prevent cam-out
- 1/4" hexagon drive (Wera connecting series 4)
- "Take it easy" tool finder: colour coding according to profile and size

The 867/4 is designed for recessed and TORX® screws, incorporating Impaktor technology for an extended service life. It is ideally suited for use with standard impact drivers. The diamond coating ensures a secure grip on the screwhead, effectively preventing cam-out. The 1/4" hexagon drive is fully compatible with the Wera Connecting Series 4. Additionally, the "Take it Easy" tool finder features color coding by profile and size for quick and easy identification.

Bits for TORX® Screws

Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

Above-average service life

Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

Reduced danger of bit

Particularly high strength. Reduce the danger of premature bit breakage.
